

Safe-T-View Egress Window Well Custom Cover

Order Form for Concrete and Timber Window Well Covers

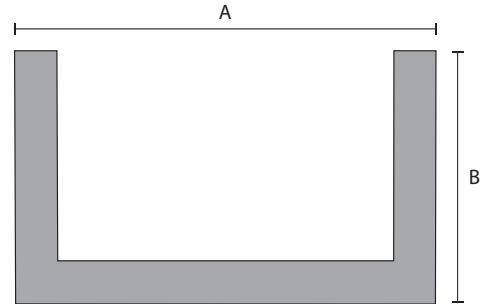

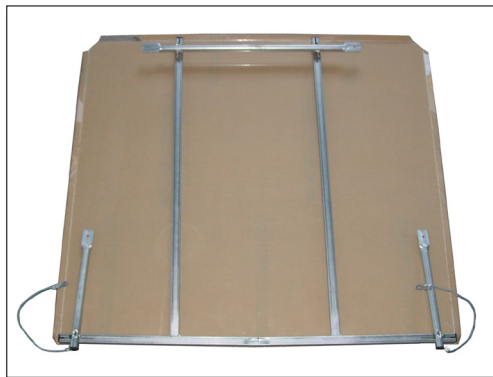

Please provide the following information for rectangular or square style openings

1. Overall width measurement "A" _____ inches
2. Overall projection measurement "B" _____ inches
3. Construction material of well concrete or timber

Custom Safe-T-View Covers™ are made to customer indicated dimensions so that the edge of the polycarbonate will slightly overhang the outside edge of the constructed well opening.

Maximum custom covers size is 24 sq ft. ("A" x "B")

Special "tube mounts" are provided. Mounts are designed to be attached to the top of each wall by multi-purpose screws. These mounts enable the cover's squeeze-n-size™ spring clips to attach to the wall while allowing ease of opening by pushing up from inside the well. Tube mounts pictured at left attached to frame (poly protection paper has not been removed).

Safety-retainer™ hinges are upgraded from standard Zytel nylon to braided/coated metal. Retainer hinges allow for opening cover without need for modification of home siding or attachment of mechanical hinges. Retainer hinges must be secured to ensure cover remains positioned over window well opening.

Cover profile will match dimensions provided with characteristic Safe-T-View Cover™ notched corners. Standard Safe-T-View Cover™ features are retained with custom sizes.
